Saskatchewan Health Authority

Private Sewage Works Designer Registration Form

As of November 1st, 2026, anyone who designs a private sewage works, other than a standard septic tank installation or a jet-type disposal system, will be required to hold a provincially recognized certification for the design or installation of private sewage works under the *The Private Sewage Works Regulations*.

For on-site sewage permit applications to be processed by the local environmental public health office, the listed private sewage designer on the permit application must be registered with the Saskatchewan Health Authority.

The purpose of this form is to register as an approved private sewage works designer with the Saskatchewan Health Authority. Please complete and return form to your local environmental public health office.
